## SUMMARY

Data & AI-focused professional with experience building dashboards, analyzing customer behavior, and turning large datasets into actionable insights. Proficient in Python, SQL, Power BI, Tableau, and data analytics, with hands-on experience supporting retention campaigns, stakeholder reporting, and automated data workflows. Interested in applying AI and analytics to solve marketing and client growth problems.

## SKILLS

**Data & Analytics:** SQL, Python, Pandas, NumPy, EDA, Statistical Analysis

**BI & Visualization:** Power BI, DAX, Power Query, Tableau, Advanced Excel

**AI/ML:** Machine Learning, Scikit-learn, Predictive Analytics, AI Tools

**Marketing Analytics:** Customer Segmentation, Retention Analytics, Campaign Performance, CRM Analytics

**Data Engineering:** ETL, Data Cleaning, Data Validation

## WORK EXPERIENCE

### JIO Private Limited

Nov 2025 – Jan 2026

Data Science Intern

Mumbai, Maharashtra

- Cleaned, transformed, and validated 50K+ records with Python (Pandas, NumPy), lifting data quality across downstream reporting workflows
- Built dashboards from structured datasets using Python, R, and SQL, directly informing stakeholder decision-making

### Proso AI India Pvt. Ltd.

Apr 2026 – Jul 2026

Data Analyst Intern

- Engineered Python (Pandas) pipelines processing 50K–300K records/month, cutting manual QA time 40% through automated validation scripts
- Built and maintained 7 dashboards tracking client retention, usage trends, and pipeline health, surfacing 3 high-churn segments for targeted retention campaigns
- Root-caused 20+ data discrepancies via SQL analysis; automated checks cut recurring issues by 65%
- Delivered weekly MIS reports to 5 stakeholders with 100% on-time delivery across a 6-month period

## PROJECTS

### Zomato Analytics Dashboard | PostgreSQL, Python, Tableau

[GitHub](#)

- Normalized 100K+ restaurant and order records into a 5-table schema; wrote 15+ SQL queries (CTEs, window functions) analyzing city-wise revenue, cuisine trends, and customer segments
- Built 2 interactive Tableau dashboards with dynamic filters at 97% data consistency, surfacing revenue trends by city and cuisine for business planning

### Bank Churn Prediction Model | SQL, Python, Scikit-learn, Tableau

[GitHub](#)

- Engineered 12 behavioural features from 10K+ customer records; trained a Random Forest model (AUC 0.91)
- Identified customers inactive 60+ days as 3× higher churn risk; delivered findings via an interactive Tableau storyboard to power targeted CRM retention campaigns

## EDUCATION

### Vellore Institute of Technology, Bhopal, India

2023 – 2027

B.Tech – Computer Science and Engineering

GPA: 8.4

## CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Power BI Certification – hands-on training in data modeling, DAX, and interactive dashboard design
- Deloitte Data Analytics Job Simulation (2025) – forensic financial analysis on large datasets in Excel and Python; delivered executive-ready risk reports
- Google Data Analytics Professional Certificate (2025)
- SQL (Advanced) – HackerRank
- Problem Solving (Python) – HackerRank

## LEADERSHIP

### Vitronix Club, VIT Bhopal

2025 – 2026

Vice President

- Led a 300+ participant drone workshop, coordinating cross-functional teams and vendors

### Linpack Club, VIT Bhopal

2025 – 2026

Vice President

- Led a 500+ participant hackathon, coordinating cross-functional teams and vendors
